Our customers experiences

- **Engages the client**
- **Reduces print costs**
- **Reduces need for on-site drawings**
- **Reduces on-site error**

- **The future**
  - *BIMcloud integration*
  - *Augmented Reality*

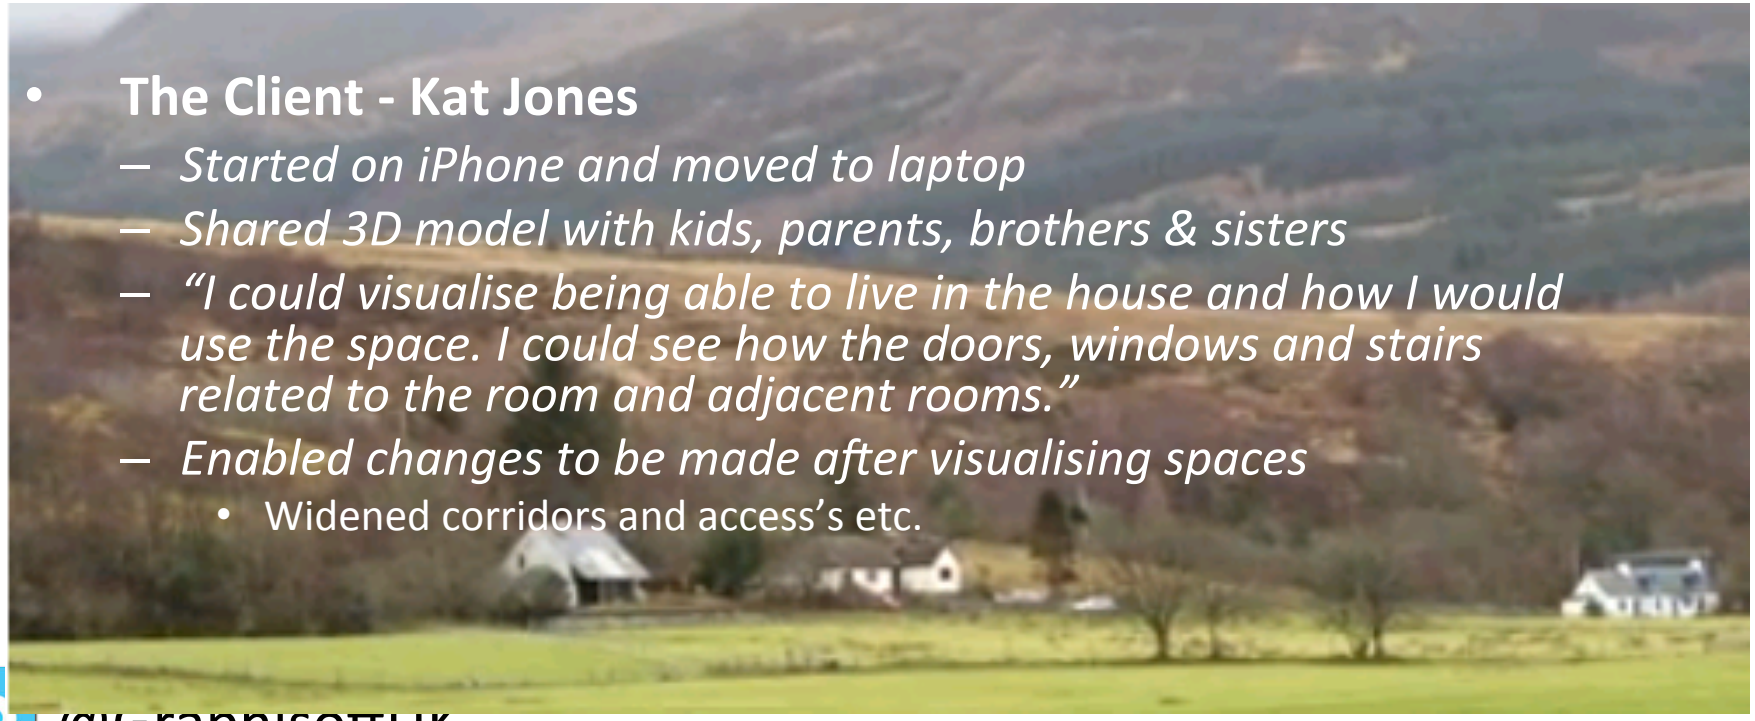
GRAPHISOFT

Cuil Bay case study

- **John Gilbert Architects – Matt Bridgestock**
  - *Started with 3D Print models but moved to BIMx*
  - *Regularly emailed the updated models, and asked for feedback*
  - *"Reassures the client that everyone has the right interpretation of how the building will work."*
  - *Enabled the architect to personalise the building by adding in paintings from a friend. Included Kat's door and window choices*



- **The Client - Kat Jones**
  - *Started on iPhone and moved to laptop*
  - *Shared 3D model with kids, parents, brothers & sisters*
  - *"I could visualise being able to live in the house and how I would use the space. I could see how the doors, windows and stairs related to the room and adjacent rooms."*
  - *Enabled changes to be made after visualising spaces*
    - Widened corridors and access's etc.
